As we enter winter, many people are forced to live on the streets because they cannot afford to buy a home at this time of year. Being said, we would like to give back to the community and help make sure that everyone has a warm winter.

From now all the way up to christmas break, everyone is encouraged to bring in CLEAN AND NEW, NOT USED AND DIRTY SOCKS. We are attempting to participate in the stepping up program

Approaches to learning **Tip of the Week:** Transfer skills

Transferring skills between subjects can enhance learning and help students apply their knowledge in various contexts.

Here are 3 transferable tips to learning:

Identify Common Themes: Look for common themes or concepts that appear in multiple subjects. For example, the scientific method in science can be related to problem-solving techniques in math.

Use Analogies: Create analogies to connect concepts from different subjects. For instance, understanding the structure of a story in literature can help with understanding the structure of a historical event.

Apply Skills in New Contexts: Practice applying skills learned in one subject to problems in another. For example, use statistical analysis from math to interpret data in a science experiment.

“The future belongs to those who learn more skills and combine them in creative ways.”

— Robert Greene
