What Can I Do With A DCS In Social Science?

Social Science lets you explore the origin, institutions and laws of the world that humankind has created. Social Scientists are interested in people and how they interact with one another and their environment. They are the politicians, psychologists, historians and lawyers who better understand our world and tackle its many challenges. On the Commerce side, the focus is more on business, — the role companies play in society and how business ethics and corporate governance shape our world. Social Science gives you a wide range of choices and allows you to learn to analyze, think critically and conduct research, which are essential skills at university and in the workplace.

*Social Science related fields include:

- Anthropology
- Archaeology
- Civil Service
- Criminology
- Demography
- Ecology
- Education
- Geography
- Government
- History
- Human Resources
- Journalism and Broadcasting
- Law
- Library Science
- Political Science
- Psychology
- Public Policy
- Religious Studies
- Social Work
- Sociology
- Urban Planning

**If you choose to take CEGEP-level mathematics, you will have more options in university.*

A Social Science Commerce / or Social Science with Math DCS will also include All Business-Related Fields:

- Accounting
- Actuarial Mathematics
- Administration
- Banking
- Business and Finance
- Corporate Law
- Demographer
- Economics
- Finance
- Human Resources
- Industrial Relations
- Insurance analyst
- Investment Brokerage
- Marketing

What Can I Do With A DCS In Liberal Arts?

You decide! Because Liberal Arts gives you such a solid foundation, you are prepared for university studies in a vast range of university programs. Liberal Arts is a program that guides students to examine the past, understand the present, and shape the future. Students in Liberal Arts explore the history of western civilization, informed by Indigenous and non-western perspectives. Through the lens of history, philosophy, literature, and religious studies, students develop a chronological understanding of the ideas and events that have fashioned our world.

Liberal Arts graduates have pursued careers in areas such as:

- Writing
- Journalism
- Teaching
- Research
- Government
- Law
- Museology
- Non-profit sector
- Theater
- Cinema
- Business, management
- Art Administration
- Art Education
- Art History
- Art Therapy
- Comparative Literature
- Creative Writing
- Digital Imaging
- Film Studies
- Graphics, Design
- Linguistics
- Photography
- Studio Arts

What Can I Do With A DCS In Arts, Literature, And Communications (ALC)?

The Arts, Literature and Communication program allows you to express yourself while gaining all the skills and prerequisites you need to follow a university program in the arts and other non-science areas. ALC is all about creativity and self-expression. It's for you if you want to discover various art forms from fine arts to cinema, literature, languages, art history and theater. ALC also gives you the opportunity to take a lot of courses that you might not be able to take in certain more focused university programs.

ALC is an amazing foundation for university. And if you want to get into a great undergraduate program that requires an art or writing portfolio, you will have many opportunities to work on it as an ALC student. After university, many career or graduate school options await you, such as:

- Art Administration
- Art Education
- Art History
- Art Therapy
- Communications, Media and Journalism
- Comparative Literature Creative Writing
- Digital Imaging
- Diplomacy and Foreign Relations
- Education
- Fashion Design
- Film Studies
- Graphics and Design
- Interdisciplinary Studies
- Law
- Liberal Arts
- Linguistics
- Modern Languages
- Museology
- Philosophy
- Photography
- Public Relations
- Religious Studies
- Social and New Media
- Social Sciences (Anthropology, Economics, Political Science, Sociology)
- Studio Arts
- Theater
- Translation/Interp.
