

Design at LCCHS

Last updated: June 20,2017

Course Overview:

As part of the Middle Years Programme (MYP), design challenges all students to:

- apply practical and creative thinking skills to solve design problems.
- explore the role of design in both historical and contemporary contexts.
- consider their responsibilities when making design decisions and taking action.

MYP design focuses a holistic design process rather than final products and solutions.

What is the significance of design in the MYP?

MYP uses the design cycle as a way to structure:

- inquiry and analysis of design problems
- development and creation of feasible solutions
- testing and evaluation of students' models, prototypes, products or systems.

How is design structured in the MYP at LCCHS?

- Minimum of 50 hours integrated into the IB French classes at all levels.
- Often includes interdisciplinary units.

Most of the above information was taken directly from the MYP website:
